

AquaMaof Launches Virtual Booth to Showcase its RAS Technology for Land-Based Seafood Production

Amid cancellation and postponement of major trade events, AquaMaof invites the seafood industry to meet up at this Virtual Reality event

Rosh Ha'ayin, Israel - June 2020 - [AquaMaof Aquaculture Technologies Ltd](https://www.aquamaof.com/), world leader in Recirculating Aquaculture System (RAS) technology, announces the opening of a virtual booth to showcase its technology and projects. With major trade events cancelled or postponed, the company has built a virtual reality (VR) stand to safely meet with the seafood industry.

This virtual expo gives decision-makers in the seafood industry the opportunity to interact with the cutting edge of AquaMaof's aquaculture technology and the experts behind it. Participants will be able to watch live and pre-recorded expert presentations, as well as explore AquaMaof projects around the world in the interactive map and gallery. The highlight is the VR tour of AquaMaof's flagship land-based salmon R&D and training center in Poland. There will also be a meeting room to schedule video-conference with representatives from AquaMaof.

"Due to the COVID situation, most of the major trade events and conferences have been postponed or cancelled," says Shai Silberman, VP of Marketing & Sales at AquaMaof. "Nevertheless, it was very important for us to meet with the industry and provide it with an update on our recent developments in RAS technology, so we came up with a safe virtual platform to make it happen. Now, more than ever, we see a growing interest in our RAS technology as an enabler of sustainable, clean, and local seafood production."

The virtual booth opens on June 2nd, 2020, with many slots available for people to visit from every corner of the globe. Participants can register their email address and enter the booth at: <https://aquamaof.vii.events/registration>

About AquaMaof Aquaculture Technologies Ltd.

AquaMaof Aquaculture Technologies Ltd. is a privately-owned company, specializing in the field of indoor aquaculture technology and turn-key projects. With over 30 years of experience, AquaMaof's team of technology and aquaculture experts has been providing research and development, as well as comprehensive design, production, operations and support solutions for aqua farming in over 50 locations around the world. The Company's unique indoor fish production platform offers advanced, sustainable, and cost-effective solution for today's fish-growing needs. From concept to operational fish production facilities, the company's cutting-edge RAS (Recirculating Aquaculture Systems) technology has been proven worldwide. The company is currently working on several large-scale Atlantic Salmon production facilities with the combined annual capacity of 60K tons in Canada, Japan, Russia, western Europe, US and more.
